Details

Description

Sound tap connectors, hose couplings and hoses are the basis of effective watering. This is why Kärcher offers a complete series of accessories for connecting, decoupling and repairing watering systems, such as the two-way coupling for precisely connecting two hoses. The two-way coupling can be used universally with all standard garden hoses and impresses with robust quality and ergonomic design for simple handling. The two-way coupling is compatible with the three most popular hose diameters and all available click systems.

Application

- For watering small to large areas and gardens
- For watering large gardens
- For watering food plants and useful plants (small beds, individual and potted plants)
- For watering ornamental plants (small beds, individual and potted plants)
- Cleaning gardening tools and garden furniture
-

Features & Benefits

Robust design

Guaranteed robustness

For connection of 2 hoses
